

ABSTRACT

Provided is a liquid skin protective composition capable of protecting the skin from chemical substances in the environment and aqueous irritants such as body fluids, wastes, and exudates, causing less irritation, being applicable easily to the skin, and giving a good skin feel.

The liquid skin protective composition contains the below-described ingredients (A) and (B) and having a water content not more than 10 wt. %:

(A) a block copolymer having a linear polysiloxane-polyoxyalkylene block as a structural unit and having an HLB not more than 6,

(B) at least one oil selected from mineral oils, vegetable oils, animal oils, synthetic oils and organopolysiloxanes other than the ingredient (A).
